## Fifth Round of Budget Cuts Follow Updated FY 2010 Revenue Numbers

### KEY TAKEAWAY:

Updated revenue estimates for FY 2010 ending June 30, 2010 now project a total deficit of \$499.1 million in state funds for the year.

Most agencies are now facing almost 9.5% in cuts to their current year budget. Due to these cuts a number of state agencies are planning furloughs.

In response to the updated revenue projections, Governor Barbour announced a fifth round of budget cuts totaling \$40.6 million.

Figure 1 shows the budget actions that have occurred since funds were initially appropriated last year and the effects on agency budgets.

**Figure 1: Cummulative Effect of Budget Cuts on FY2010 State Support Budget**

Total State Support Appropriations Plus AARA for FY2010	Budget Cuts as of 12/31/2009	January Budget Cuts	February Budget Cuts	March Budget Cuts	Total	Budget Cuts Restored by Legislature	Total Effective FY2010 Budget Cuts
\$5,870,521,734	\$221,882,082	\$215,617,918	\$21,000,635	\$40,600,018	\$499,100,636	\$82,000,000	\$417,100,636

### The Net Effect of Budget Cuts and Restorations

Before the latest cuts were announced, the legislature enacted and the Governor signed a measure which restored \$82 million of the previous budget cuts with special reserve funds.

Those restored funds will still take effect. So, while a total of \$499.1 in cuts have been made, \$82 million have been restored, making the total effective cuts approximately \$417 million.

### Conclusion:

As the current fiscal year winds down, and lawmakers turn their sights towards the development of next year's budget, a cuts only strategy will only exacerbate the harm caused by five rounds of cuts in 2010. A balanced approach that includes raising revenue, especially through measures that take into account one's ability to pay, has been shown to be less harmful to a state's economy than state budget cuts. The approach also preserves critical investments in education, health care and public safety to move the state forward when prosperity returns.
